

Name:	Priority 1: Provide a brief description of the specific legislative issue	Priority 1: Desired Outcome: Clearly articulate the desired outcome you hope to achieve through legislative action	Priority 1: Impact: Explain the positive impact achieving this outcome would have on students, staff, and the school district	Priority 2: Provide a brief description of the specific legislative issue	Priority 3: Provide a brief description of the specific legislative issue	Priority 4: Provide a brief description of the specific legislative issue	Priority 5: Provide a brief description of the specific legislative issue	Priority 2: Desired Outcome: Clearly articulate the desired outcome you hope to achieve through legislative action	Priority 2: Impact: Explain the positive impact achieving this outcome would have on students, staff, and the school district
Chris Meyer	Fixing the SOQ funding formula that short changes our school districts each year.	A legislative fix.		Ability of School Boards to hold their own funding referendums or bond votes				Receive the power to raise funds beyond the groveling we have to do to our local Council.	Better facilities.
Lisa	School Facilities Funding	Amend the Code of VA to allow all localities the option of increasing local sales taxes specifically for the purpose of school construction and major renovation/modernization.	Local control and specific CIP funding for school construction/modernization to address all of our buildings and new construction needed.	Election of Board of Education Members	Would require the BOE to provide standards that parallel SOQ and SOL but specific to building maintenance (physical environment of Va. School buildings) with my interest being in Air Quality monitoring			Support of changing the selection method of members of the State BOE from appointment by the Governor to election by local school board members, on a Congressional district basis (one per district)	Standards of Maintenance Bill or legislation
