

CCS Strategic Plan

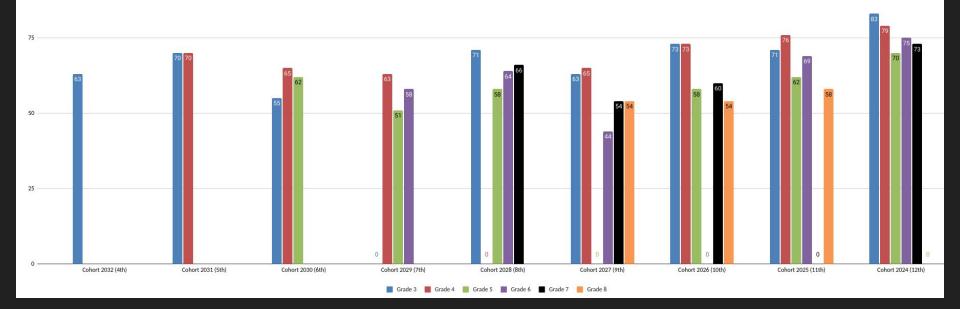

2023 - 2028

Priority 1:

Increase Academic Achievement

Increase Reading and Math
 achievement for all students across
 all student membership groups.

Reading SOL Pass Rates (Unadjusted) - 75% State Benchmark

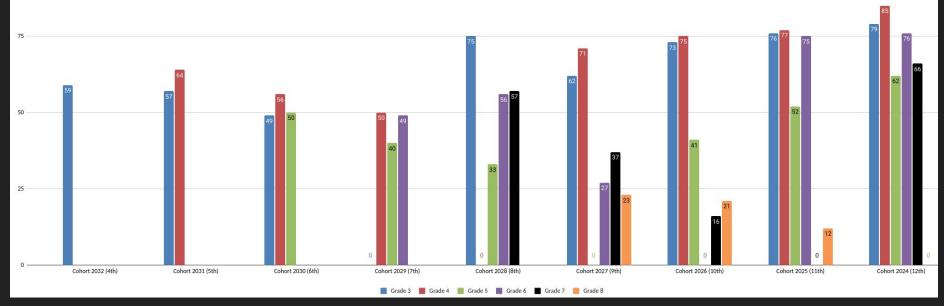

Year to Year Reading Performance by Cohort:

- Current grade level is in parentheses
- The "0" represents the 19-20 school year No Testing due to school closures
- Starting with the 2029 cohort, the bar after the "0" represents the 20-21 school year. Those results reflect reduced student participation in state reading assessments due to COVID-19. The wide variations in participation rates and learning conditions should be taken into consideration when reviewing 2020-2021 data.

NWEA MAP Growth Data Fall 2022 to Fall 2023 Comparison

MAP Growth Assessment

Some assessments, like the SOLs, are criterion-referenced and compare student performance to strict performance criteria. In these tests, student performance is determined to be acceptable, or not (pass/fail), relative to a strict performance criteria or 'cut score'. Student success is independent of every other person taking the test.

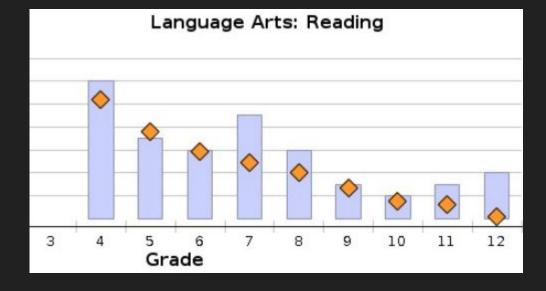

Other assessments are **norm-referenced**. With norm-referenced tests, student performance is reported in terms of how they compared to others.

Instead of declaring a student 'proficient', 'advanced', or 'below basic', norm-referenced tests typically tell you how the students' performance compared to the rest of the students who took the test by providing the percentile score. This number tells what percent of their peers did better or worse than they did on the test. MAP is a norm-referenced test.

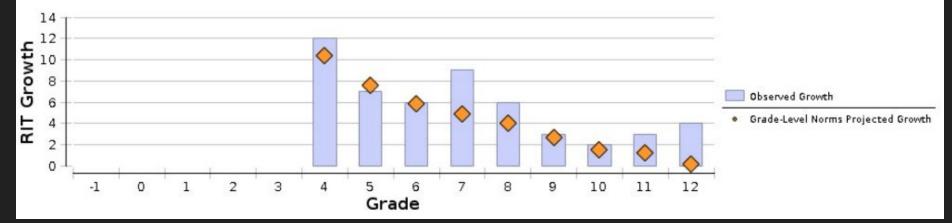

That means, MAP Growth tests tell you how every child's performance compares to that of the millions of other students in the same grade from across the country who have taken the MAP Growth tests in each content area.

Reading Growth Highlights

- Grades 4, 6-8 and 9-12 met or exceeded their projected growth.
- The grade 4 cohort achievement percentile increased from 64 to 72, performing better than 72% of other 4th-graders across the country AND ranking in the 80th percentile for the amount of growth made.
- The grade 7 cohort achievement percentile increased from 34 to 59, ranking in the 99th percentile for the amount of growth made.
- The grade 8 cohort achievement percentile increased from 60 to 67, ranking in the 86th percentile for the amount of growth made.
