Fiber Project Update

JUNE 5, 2025

Pat Cuomo & Andy Jones

Strategic Plan

CHARLOTTEVILLE
CITY SCHOOLS

Priority 4 - Target 8

Ensure effective and efficient operations.

100% of school campuses and offices
will be connected via
Private Fiber Network.

Background

Charlottesville City Schools is aware of the desire to be able to stream sporting events at the Stadium.

Other projects such as school security systems and the building of our Private Fiber Network have taken priority over this request.

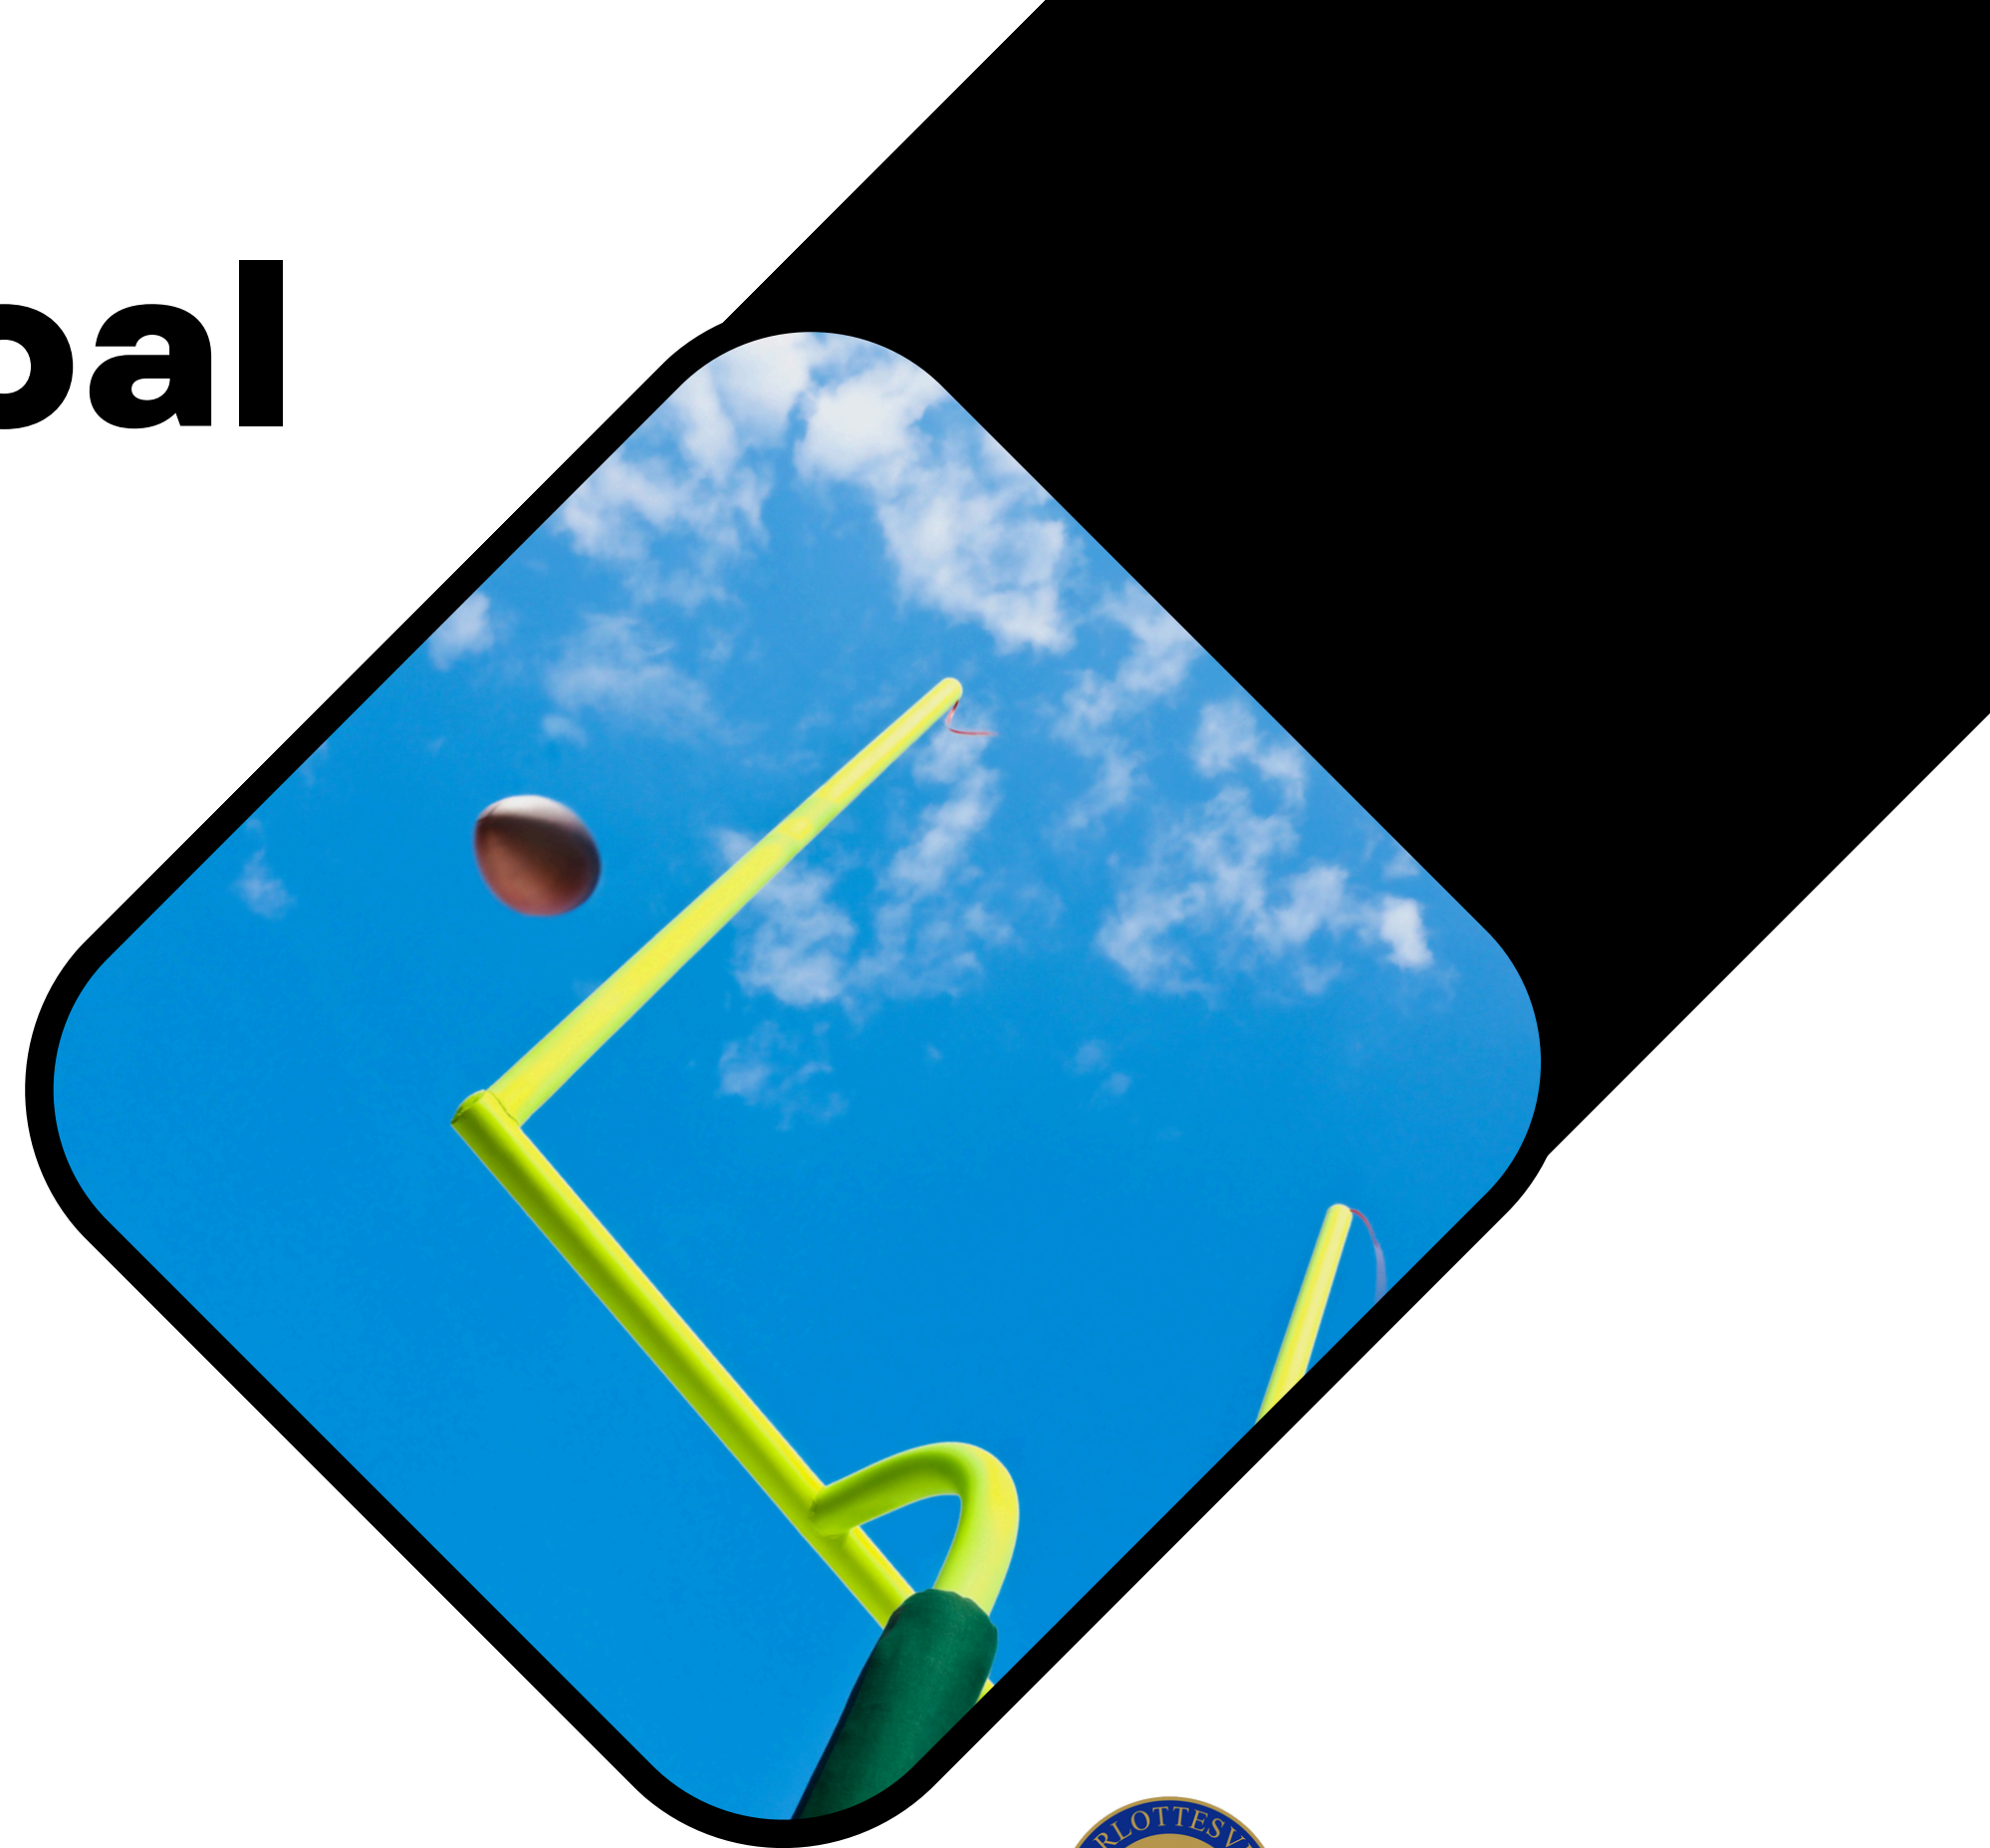

CHARLOTTESVILLE
CITY SCHOOLS

Long Term Goal

The long term solution is to run fiber from Charlottesville High School to various athletic fields, including the stadium.

The initial phase of construction would include wired connectivity to the CHS Stadium for streaming live events.

Future phases of construction and hardware purchases would allow for wired connectivity at other CHS athletic locations.

Phase I

Estimated timeline would start project in *October 2025* and finish by *March 2026* to be ready for the 2026-2027 school year.

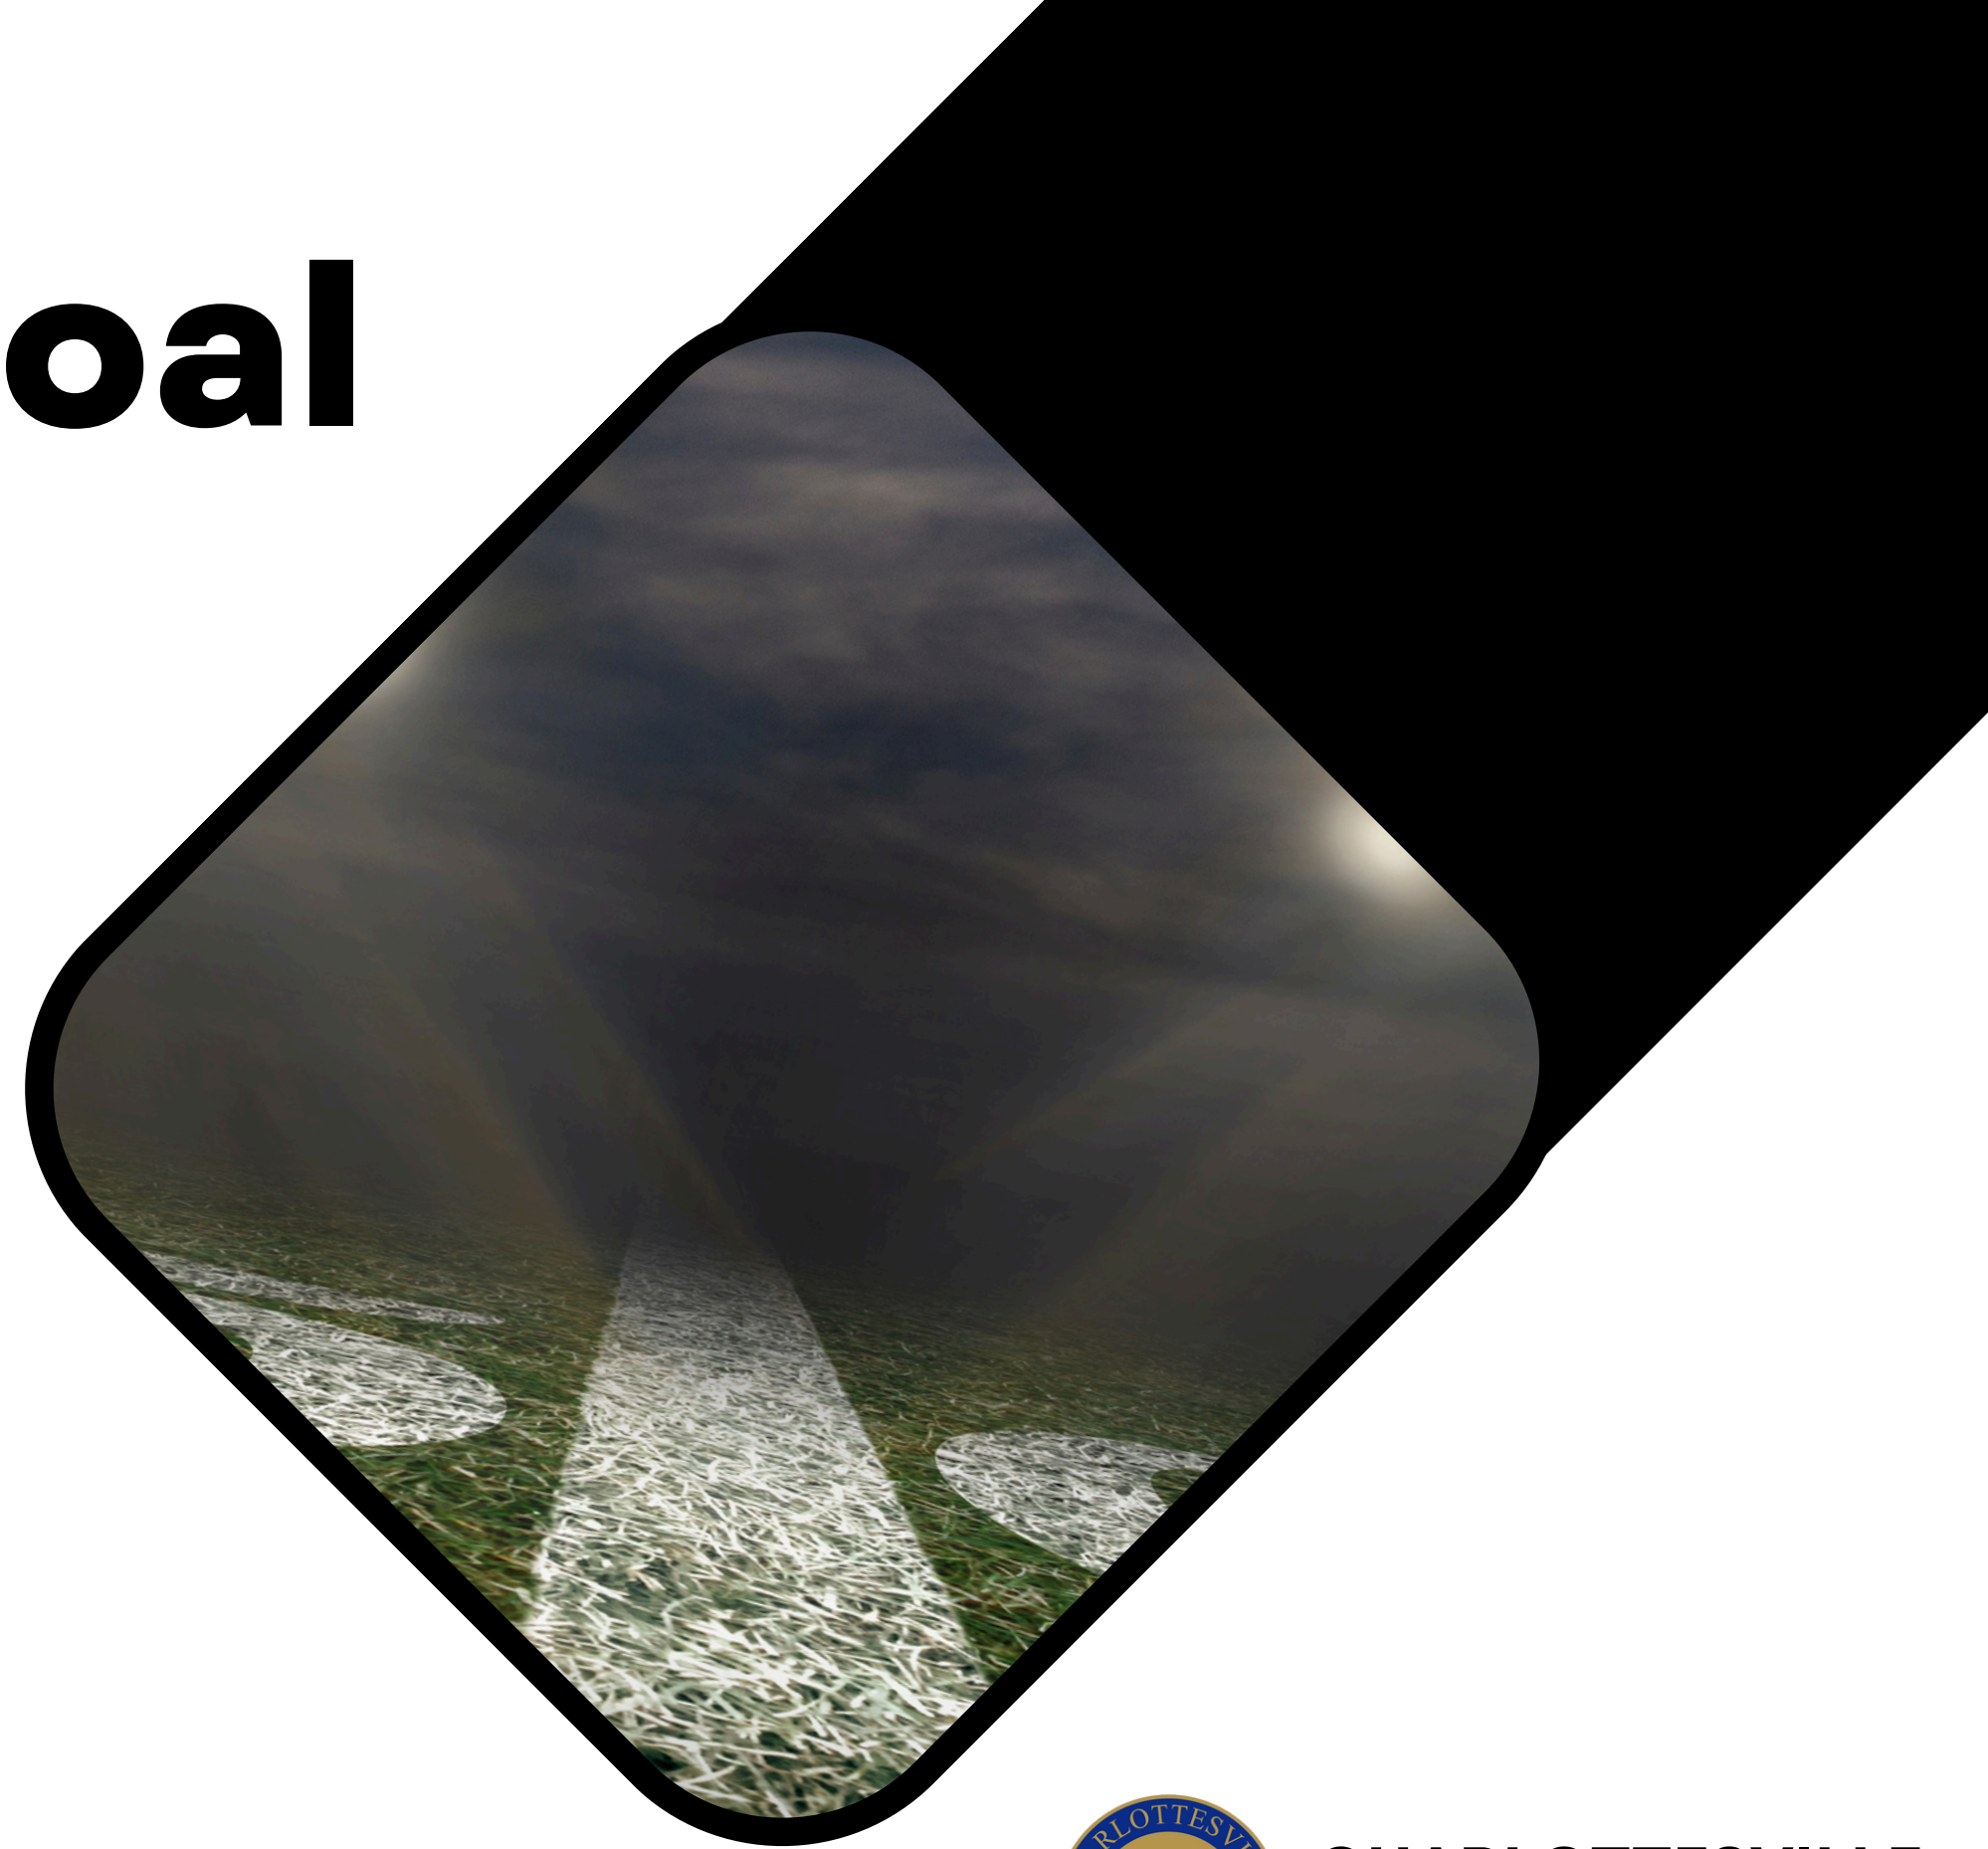

- Splice to Main Data Ctr.
- Acquire Permits
- Stadium Fiber
- Stadium Hardware
- Connectivity
- Future Ready Fiber

Short Term Goal

Andy Jones is working with current vendors within the CCS Athletic Department to find a solution for streaming events at the CHS Stadium during the 2025-2026 school year.

This process is ongoing.
