

Charlottesville City Schools

Local Plan for the Education of the Gifted 2024-2029

LEA#	104		
Superintendent	Dr. Royal Gurley, Superintendent		
Mailing Address	1562 Dairy Road Charlottesville, VA 22903		
Gifted Education Coordinator/ Designee	Dr. Deanna Isley	Title Address Telephone E-mail	Coordinator of Professional Learning and Gifted Education 1400 Melbourne Rd. Charlottesville, VA 22901 434-245-2965 isleyd1@charlottesvilleschools.org
Local School Board Chairperson	Ms. Lisa Larson-Torres		
Date Approved by School Board	May 30, 2024		

Charlottesville City Schools

Local Plan for the Education of the Gifted

Each school board must review and approve a comprehensive plan for the education of the gifted. That plan must provide specific explanations of the school division's implementation of the *Regulations Governing Educational Services for Gifted Students*. School divisions, working in conjunction with their school boards, should determine the appropriate timeframe of applicability for their division's gifted plan. Historically, division plans span five years. For the technical review, the DOE will request a division to send their most current, approved plan at the time of the review. The applicable timeframe for the division's plan does not need to correspond to the collection year of their technical review. Information on the DOE technical review schedule can be found at the gifted education homepage at the Virginia Department of Education's Web site [Gifted Ed Homepage - http://www.doe.virginia.gov/instruction/gifted_ed/index.shtml](http://www.doe.virginia.gov/instruction/gifted_ed/index.shtml)

Section 8VAC20-40-60A of the *Regulations* states that, "Each school board shall submit a comprehensive plan for the education of gifted students to the Department of Education (DOE) for technical review on a schedule determined by the Department. Each school board shall approve a comprehensive plan for the education of gifted students that includes the components identified in these regulations." To assist school divisions and school boards in complying with section 8VAC20-40-60A, the Virginia Department of Education has created this template for developing Local Plans for the Education of the Gifted (revised January 2011). This public document addresses all aspects of local services for gifted students, including, but not limited to, the area(s) of giftedness the school division will serve, an operational definition of giftedness in the division and its supporting identification procedures, program services, professional development, curriculum development, and parent and community involvement.

Each section of the plan should address specific procedures and information for each area of giftedness identified by the school division. If a school division identifies students in general intellectual aptitude (GIA) and specific academic aptitude-mathematics (SAA-M), then the section for referral procedures, for example, should reflect the specific referral procedures for GIA and SAA-M. Throughout the local plan template, school divisions may need to copy and paste the drop down boxes, the insert text form fields, and any pertinent information for each area of giftedness identified by the division. In order to be able to 'choose an item' from a drop down box, simply right click on the highlighted 'choose an item' wording and the drop down arrow should appear on the right. Right clicking on the arrow will then allow the drop down box choices to appear. If certain procedures or policies apply to more than one area of giftedness, simply copy and paste the drop down selection box to reflect all areas of giftedness that are applicable to the procedures or policy.

Once the completed comprehensive local plan for the education of gifted students has been approved by the local school board, the plan shall be accessible to the public through the division's website. The division shall ensure that printed copies of the plan are available to citizens who do not have online access.

For more information, contact the Virginia Department of Education specialist for Governor's Schools and Gifted Education at 804-225-2884.

Charlottesville City Schools

General Information regarding the Gifted Program in Charlottesville City Schools

In section 8VAC20-40-40A of the *Regulations*, divisions are required to screen, refer, identify, and serve gifted students in at least general intellectual aptitude or specific academic aptitude. School divisions may identify and serve gifted students in career and technical aptitude or visual or performing arts aptitude, or both, at their discretion. On the chart below, please indicate all areas of giftedness that are identified and served within the division. Please copy and paste any additional rows as might be needed to address all areas in Specific Academic Aptitude and/or Visual and/or Performing Arts that are identified by the school division.

Area of Giftedness Identified by the Division	Grades Served
General Intellectual Aptitude (GIA)	NA
Specific Academic Aptitude (SAA) - English	3-12
Specific Academic Aptitude (SAA) - Mathematics	3-12
Career and Technical Aptitude (CTA)	NA
Visual and/or Performing Arts Aptitude (VPA) - Choose an item.	NA

(Please highlight, copy, and insert SAA and/or VPA rows as necessary to reflect all areas of giftedness served by the school division.)

Charlottesville City Schools

Part I: Statement of Philosophy and Local Operational Definition of Giftedness for the School Division (8VAC20-40-60A.1)

A. Division Statement of Philosophy for the Education of Gifted Students

Charlottesville City Schools is committed to developing the talents of every learner with aligned collaborative experiences in general education classrooms. All students should be exposed to rich, rigorous learning experiences that challenge them to stretch their thinking. Our vision is for gifted students to acquire the knowledge, skills, behaviors, and attitudes to achieve their learning potential. They are encouraged to embrace diversity, explore possibilities, and aspire to excellence.

B. Division Operational Definition of Giftedness

This section should include an operational definition for each area of giftedness (general intellectual aptitude, specific academic aptitude, visual and/or performing arts aptitude, or career and technical aptitude) identified and served by the division. An operational definition provides the concrete, observable, and/or measurable criteria for 'giftedness' used by the division in the identification process. Such a definition might include a listing of the evidence of student readiness for gifted educational services, e.g. evidence of gifted behaviors as determined by a valid and reliable teacher checklist or evidence of superior academic performance based on a norm-referenced assessment of aptitude.

Charlottesville City Schools views giftedness through a lens of talent development. We believe that all students are talented and we cultivate their potential through collaborative, high quality, differentiated instruction. We recognize that the need for students to think and perform at high levels is important for cultivating their potential for advanced learning.

Specific Academic Aptitude: Students who demonstrate or have the potential to demonstrate strong reasoning, intellectual curiosity and creative and imaginative problem solving in English and/or mathematics through multiple criteria including norm referenced measures.

Charlottesville City Schools

Part II: Program Goals and Objectives (8VAC20-40-60A.2)

This section should include goals and objectives for the school division's gifted education program. Specific references pertaining to each area of giftedness identified by the division should be clearly indicated.

A. Identification:

Goal: Provide an identification process with a talent development perspective that identifies diverse students from all populations and supports the division's service delivery models.

Objectives:

1. Review annually with a lens of equity the materials and process used for identification in each school to monitor for the consistent use of evidence and analysis.
2. Continue to implement and strengthen the use of multiple criteria in screening and identification processes including alternative data and evidence of critical and creative thinking.

B. Delivery of Services:

Goal: Provide students with appropriately challenging educational opportunities that address their learning needs and help them develop their talents to the fullest potential.

Objectives:

1. Design and deliver services based on research of effective practices that develop a talent development framework.
2. Continue to provide appropriate evidence based enrichment offerings for all identified students.

C. Curriculum and Instruction:

Goal: Provide differentiated curricular options, instructional approaches, and resource materials that support the needs of learners in a talent development framework.

Objectives:

1. Collaborate with classroom teachers on instructional planning and delivery that focuses on appropriate extension and rigor and that help students think and understand deeply.

Charlottesville City Schools

2. Continue to design and/or refine differentiated curriculum that attends to student needs.
3. Monitor and advocate for supports and structures that facilitate co-planning and co-teaching between classroom teachers and gifted resource teachers.

D. Professional Development:

Goal: Provide ongoing professional learning around evidence based, best practices in developing the talents of all learners.

Objectives:

1. Continue to provide ongoing professional development around the principles of differentiated instruction and talent development for a broad range of learners.
2. Promote collaboration between gifted resource teachers and classroom teachers, including the sharing of best practices and differentiated instructional strategies, in order to develop challenging learning experiences.

E. Equitable Representation of Students:

Goal: Use qualitative and quantitative data to identify and develop the talents of all students, including those from historically underrepresented groups.

Objectives:

1. Implement talent development learning experiences in order to observe and foster the potential of all students.
2. Monitor the equitable representation of students identified and served by gifted resource teachers.

F. Parent and Community Involvement:

Goal: Enrich and expand parent, school, staff, and community understanding of talent development as a framework for gifted education.

Objectives.

1. Continue to cultivate an effective working relationship with the Gifted Advisory Committee.
2. Use multiple forms of communication, including the division Gifted Education website, to keep parents and community members informed of the processes used

Charlottesville City Schools

to identify and serve students in a talent development framework and solicit feedback.

Charlottesville City Schools

Part III: Screening, Referral, Identification, and Service Procedures

A. Screening Procedures (8VAC20-40-60A.3)

This section should provide screening procedures for each area of giftedness identified and served by the division. These procedures should include the annual review of student data used to create a pool of potential candidates for further assessment. Specific references pertaining to each area of giftedness identified by the division should be clearly indicated.

Screening Procedures for Specific Academic Aptitude (English and Mathematics)

Every student in 3rd grade and beyond is included in annual screening to determine eligibility for gifted services. Data to be reviewed includes classroom performance, division English and/or mathematics assessment results and scores on state and national assessments. Staff members are sensitive to information that highlights student interests, talents, and preferred learning styles of students from underserved populations. For students who have been referred and not identified for three consecutive cycles, they will also be screened, but only be referred if there has been marked change in achievement.

Because students may be found eligible in both English and mathematics, the screening procedures address both aptitude areas.

Charlottesville City Schools

B. Referral Procedures (8VAC20-40-60A.3)

This section provides referral procedures for each area of giftedness identified and served by the division. These procedures shall permit referrals from parents or legal guardians, teachers, professionals, students, peers, self, or others. These procedures should include to whom referrals are submitted and the timeline for the division to provide parents/guardians with the results of the eligibility process. Specific references pertaining to each area of giftedness identified by the division should be clearly indicated.

Referral procedures for Specific Academic Aptitude (English and mathematics)

The division implements equitable referral procedures. On April 1 each year, the division automatically refers every student in 3rd grade and beyond who is enrolled in the division as of March 1 of that year and has taken a nationally normed assessment. For grades 3-8, CCS administers the MAP assessment. For grades 9-12 the nationally normed assessments may be MAP or another nationally normed test (i.e. PSAT, SAT, ACT, etc.). For students who have been referred and not identified for three consecutive cycles, those students will then only be referred if there has been marked change in achievement. This referral can be initiated by a staff member, family member, community member, or the student themselves.

Rather than completing a referral, parents can choose to not have their child participate in the gifted identification process. An opt-out form is available at schools, from gifted resource teachers, and on the division website. By April 15, a parent must submit an opt-out form to their school for their child to not be referred. The division adheres to the following timeline:

Area of Giftedness	Screening	Referral/ Nomination Deadline	Identification Meetings	Timeline for Providing Results
Specific Academic Aptitude	Spring	By April 1- CCS referral deadline By April 15- Parent submits opt out form for the student to <u>not</u> be referred	May/June	June

Charlottesville City Schools

C. Identification Procedures (8VAC20-40-60A.3)

This section provides identification procedures for each area of giftedness identified and served by the division. Identification in GIA programs shall be K-12 and must include a nationally norm-referenced aptitude test. Identification in SAA programs shall be K-12 or as assessment instruments exist to support identification, and must include either a nationally norm-referenced aptitude or achievement test. Identification in CTA and VPA programs shall be at the discretion of the school division. Specific references pertaining to each area of giftedness identified by the division should be clearly indicated.

In a talent development model, the purpose of identification is to inform standards-aligned differentiated instruction and consider the most appropriate decisions for the student. The division recognizes that significant potential exists among many more students than have been traditionally identified and is implementing identification practices for all students. Each referred student is considered for gifted identification based on the individual's strengths. No single instrument, score, or criteria may be used to exclude a student from eligibility.

Prior to the point of gifted identification, classroom teachers and gifted resources teachers offer all students multiple, ongoing opportunities to develop their potential. Through talent recognition and development opportunities, the abilities of all students are nurtured.

Gifted identification begins at the end of 3rd grade and goes through 12th grade. The eligibility process is annual, beginning April 1. Each school's gifted identification committee reviews student data with the lens of identifying learners who respond fully to Tier 1 instruction in the general education classroom setting and participate in assessments based on grade level standards. Eligibility decisions are communicated to families at the end of the academic year.

1. Multiple Criteria Listing (8 VAC 20-40-40D.3)

This section includes the three or more categories that divisions shall include to develop a profile or composite for each student being considered. This listing of categories should be repeated for each area of giftedness identified by the division. Please copy and paste the section below to support all identified areas of giftedness. NOTE: Selection of either item 5a or 5b or both counts as a single category.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

- 1. Assessment of appropriate student products, performance, or portfolio
- 2. Record of observation of in-class behavior
- 3. Appropriate rating scales, checklists, or questionnaires
- 4. Individual interview

Charlottesville City Schools

___ 5a. Individual or group-administered, nationally norm-referenced aptitude test(s) (must be included for GIA)
and/or

5b. Individual or group-administered, nationally norm-referenced achievement test(s)

6. Record of previous achievements (awards, honors, grades, etc.)

7. Additional valid and reliable measures or procedures

- Specify:

- ACCESS for ELLs 2.0
- Advanced Placement examinations
- VALLS (formerly PALS)
- DIBELS
- Virginia Standards of Learning Tests

2. Additional identification information for [Click here to select area of giftedness.](#)

Insert Identification Procedures

Charlottesville City Schools

D. Placement Procedures (8VAC20-40-60A.3)

This section provides procedures for the placement of gifted students in each area of giftedness identified and served by the division. These procedures include information about the identification and placement committee.

1. Identification/Placement Committee (8VAC 20-40-40D)

- a. This section includes the minimum **number** of persons comprising the Identification/Placement Committee by category.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

 2 Classroom Teacher(s)

 1 Gifted Education Resource Teacher(s)

Counselor(s)

 School Psychologist(s)

 Assessment Specialist(s)

 1 Principal(s) or Designee(s)

 Gifted Education Coordinator

 2 Other(s) Specify: ESL Teacher, Special Education Teacher

- b. Type of Identification/Placement Committee

This section indicates the type of Identification/Placement Committee the division uses.

 v School-level

 Division-level

Charlottesville City Schools

2. Eligibility (8VAC20-40-60A.3)

This section includes a chart detailing all criteria that could be considered in the identification process for a specific area of giftedness identified by the division. A description of the eligibility process used by the committee to make decisions regarding eligibility for services shall follow the chart. It includes a timeline for making eligibility decisions within 90 instructional days of the school division's receipt of the parent's(s') or legal guardian's(s') consent for assessment.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Measure	Administered/ Completed by	Scored by	Provided to the committee by
<i>Ex. Behaviors checklist</i>	<i>Current classroom teacher</i>	<i>School gifted education teacher</i>	<i>School division gifted education coordinator</i>
Progress Reports, CTSS tier	Classroom teacher	Classroom teacher	Classroom teacher
Student academic performance and achievements	Classroom teacher	Classroom teacher	Gifted resource teacher
VALLS (formerly PALS) assessments	Classroom teacher and/or specialist	Classroom teacher and/or specialist	Gifted resource teacher
DIBELS assessments	Classroom teacher and/or specialist	Classroom teacher and/or specialist	Gifted resource teacher
Inquiry Design Model activities	Classroom teacher	Classroom teacher	Gifted resource teacher
Division Term Tests	Classroom teacher	Classroom teacher	Gifted resource teacher
Measures of Academic Progress (MAP)	Classroom teacher and/or gifted resource teacher	Scoring Service	Gifted resource teacher
College Board PSAT or SAT	School testing coordinator	Scoring Service	Gifted resource teacher
VA Standards of Learning Tests	Classroom teacher	Scoring Service	Gifted resource teacher
WIDA ACCESS for ELLs	ESL teacher	Scoring Service	ESL teacher and/or gifted resource teacher

Eligibility for Specific Academic Aptitude

Local Plan for the Education of the Gifted

Charlottesville City Schools

Each school convenes an identification committee to review student data by aptitude area: English and mathematics. The committee reviews student data with the lens of identifying learners who respond fully to Tier 1 instruction in the general education classroom setting and participate in assessments based on grade level standards.

The committee completes a holistic evaluation of the student. It reviews all the data on the spreadsheet and looks for at least two pieces of supporting documentation. Based on this information, committee members reach a consensus on eligibility decisions. The division does not allow one single criterion to guarantee or deny access to gifted identification.

The eligibility process is annual, beginning April 1st for students in 3rd grade and beyond who are enrolled in the division as of March 1st of that year and were not identified for Charlottesville's gifted services in previous years. Within 90 days of this date, eligibility decisions are forwarded in writing to the candidate's parents/guardians.

Charlottesville City Schools

3. Determination of Services (8VAC20-40-60A.3)

This section describes the process of determining appropriate educational services for identified K-12 students.

Area of Giftedness: Specific Academic Aptitude (English and mathematics).

Together gifted resource teachers, classroom teachers, and administrators at the school determine for identified students the appropriate talent development options. As these services integrate with the general education program and occur in the general education classrooms, parental permission to participate is not required.

Parents are kept informed of the services available to their child through regular communication from the school. Adjustments in services or changes in placement are made as needed with parental notification.

Charlottesville City Schools

Part IV: Notification Procedures (8VAC20-40-60A.4)

This section includes the procedures used for (a) notifying parents/guardians when the individual identification process is initiated; (b) requesting permission for individual testing and/or collection of additional information; (c) requesting permission for provision of appropriate service options; and, (d) parents/guardians wishing to file an appeal of the identification outcome, change in placement, or exit decision. Any procedural differences pertaining to a specific area of giftedness identified by the division should be clearly indicated.

Area of Giftedness: Specific Academic Aptitude (English and mathematics).

1. General Information

Through division events and resources such as meetings, newsletters, audio messages and websites, parents and guardians are kept informed of gifted identification procedures and timelines.

2. Permission for Evaluation

The division communicates to families that it evaluates students annually in 3rd grade and beyond for gifted identification. Parents/guardians who do not want their child considered have the option of submitting the opt out form to the school by April 15.

For identification purposes, the division uses national-normed achievement tests that are given at least annually to all students in grade 3 and above. If additional testing is required, the parents/guardians are notified and written permission to administer the test is requested. If there is no response to the first communication sent home, the school makes at least one additional attempt to obtain permission and information. Consent via a phone conversation or email is acceptable. The school documents its communication efforts with the candidate's parents or guardians.

3. Permission for Placement

Within 90 instructional days, eligibility decisions are forwarded in writing to the candidate's parents/guardians. The communication contains the person to contact if the parents/guardians would like more information or have questions regarding the decision. The letter also includes a request for permission to place the student in the program. Parents/guardians are asked to sign the form and return it to the child's school.

4. Notification of the Right to Appeal

Parents/guardians of students not found eligible for gifted identification receive written notification of the decision. The communication includes the title of a person to contact regarding the decision and timeline for submitting a written appeal if they wish to do so.

5. Appeal Process

Charlottesville City Schools

Parents/guardians who choose to appeal a gifted identification decision must submit a written request for review to the Coordinator of Gifted Education within fifteen (15) instructional days of contacting the school and discussing the appeals process. An appeal is based on the evidence that was reviewed at the original identification meeting. If new evidence is to be presented, the case may be brought to the next regularly scheduled identification meeting.

The Appeals Committee has fifteen (15) instructional days to complete the appeal. The Coordinator of Gifted Education serves as chairperson of the Appeals Committee and directs the appeals process, including all communication. Personnel serving on the committee may include the coordinator, the Chief Academic Officer, a gifted resource teacher, a school counselor, and a classroom teacher who taught the candidate. A majority of the members of the Appeals Committee shall not have served on the committee that rendered the original decision, but at least one member shall have served on the identification committee. Decisions made by the Appeals Committee are of two types:

1. The student is eligible for gifted identification.
2. The student is not eligible for gifted identification at this time.

The chairperson forwards written copies of the Appeals Committee decision to the appropriate school principal and the candidate's parents/guardians within ten (10) instructional days of the Appeals Committee meeting. The decision of the appeals committee is considered final. The student is eligible for re-nomination the next school year.

6. Change in Student Placement

The division does not reevaluate students who have been identified as gifted by the Charlottesville City Schools as long as the student maintains enrollment in the divisions. The students retain such identification until graduation unless the parent or guardian formally requests removal from the program.

7. Making an Exit Decision

At any time, parents/guardians may request that their child not be identified as gifted. The request must be in writing, is placed in the student's file, and is immediately honored.

Charlottesville City Schools

Part V: Change in Instructional Services (8VAC20-40-60A.5)

This section includes the policy for written notification to parents or legal guardians of identification and placement decisions, including initial changes in placement procedures or exit policy from the program.

Area of Giftedness: Specific Academic Aptitude (English and mathematics).

Parents/guardians of students identified as gifted receive written notification of the decision. The notification includes school contact information. A student identified retains such identification until graduation unless the parent or guardian formally requests removal from the program.

At any time, parents/guardians may request that their child not take part in any gifted services that occur outside the general education classroom. The request must be in writing and is placed in the student's file. The request is immediately honored.

Any student withdrawn by a parent may be reconsidered at any time. Parents of the student may initiate such a request to an administrator, gifted resource teacher, or classroom teacher. Participation resumes when reasons for withdrawal change.

Charlottesville City Schools

Part VI: Evidence of Appropriate Service Options (8VAC20-40-60A.10)

This section provides evidence that gifted education service options from kindergarten through twelfth grade are offered continuously and sequentially, with instructional time during the school day and week to (i) work with their age-level peers, (ii) work with their intellectual and academic peers, (iii) work independently; and (iv) foster intellectual and academic growth of gifted students. Parents and legal guardians shall receive assessment of each gifted student's academic growth. Career and Technical aptitude programs and Visual and/or Performing Arts programs are offered at the discretion of the school division.

A. Service Options are Continuous and Sequential

This section provides evidence that the division's program of curricula and instruction for gifted learners is continuous and sequential. GIA programs need to provide evidence from kindergarten through twelfth grade. SAA programs need to provide evidence that service options are continuous and sequential from identification until twelfth grade.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Through talent recognition and development opportunities in grade K-3, classroom teachers and gifted resource teachers offer all students in the general education classroom multiple, ongoing opportunities to develop their potential.

Beginning in 4th grade, students who are identified as gifted receive services in English and/or mathematics in the general education classroom. At all levels, they have access to differentiated curriculum and instruction that is response to the educational needs of the learner. The program is grounded in the core curriculum but is differentiated, modified and expanded to provide appropriate learning challenges. The level and pace at which the content is delivered is dependent on the academic readiness level of the student.

Elementary School: At the elementary school level, collaboration efforts between and among classroom teachers and gifted resource teachers allows for services that integrate with the general education program. Differentiated English and/or mathematics instruction results from professional learning for all teachers, collaboration between teachers, extension activities, whole group lessons and small group configurations based on student interest, readiness, and learning profile.

Middle School: At the middle school level, differentiated English and/or mathematics instruction results from professional learning for all teachers, collaboration between teachers, extension activities, whole group lessons and small group configurations based on student interest, readiness, and learning profile. Collaboration efforts between and among classroom teachers and gifted resource teachers allows for services that integrate with the general education program. In addition, the mathematics program is designed to potentially enable

Charlottesville City Schools

students to accelerate the pace of their learning in the traditional math sequence of courses.

High School: At the high school level, students can choose course options which include dual enrollment and Advanced Placement classes in English and mathematics as reflected in the CCS Program of Studies. Carefully planned curricula provide experiences that extend the learning to meet student needs utilizing differentiation. The gifted resource teacher and counseling department work in consultation with students, teachers, parents, and administrators to provide academic resources and support.

B. Service Options Provide Instructional Time with Age-level Peers

This section includes a description of the instructional strategies or program model that allows gifted students to interact with their age-level peers during the school day and week.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Students have multiple opportunities to learn with age-level peers in experiences that include investigations, projects, presentations, and collaboration. Gifted resource teachers work with classroom teachers to adapt the core curriculum to meet learners' needs while also providing time for students to interact with their classmates.

C. Service Options Provide Instructional Time with Intellectual and Academic Peers

This section includes a description of the instructional strategies used in the division to accelerate and enrich the content for gifted learners beyond the grade-level or course expectations for all learners. The description should include how these academic needs are met during the school day and week.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Students have opportunities to learn with intellectual and academic peers through flexible grouping. Gifted resource teachers work closely with classroom teachers to extend the core English and/or mathematics curriculums as well as provide supplemental learning experiences. Instructional strategies can include flexible groupings, project-based learning, cross-curricular units, Socratic seminars and differentiated instruction using available research-based materials.

D. Service Options Provide Instructional Time to Work Independently

This section includes a description of the instructional strategies or program model used in the division to allow gifted learners to work independently during the school day and week.

Charlottesville City Schools

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Students have opportunities to participate in research projects, inquiry design model experiences, and/or self-selected independent work. They are encouraged to become self-directed, independent learners while developing their organizational, research, and communication skills. Classroom teachers and/or gifted resource teachers monitor student progress and provide opportunities for students to become proficient in using rubric-based assessments.

E. Service Options Foster Intellectual and Academic Growth

This section includes a description of the instructional strategies used in the division to foster intellectual and academic growth during the school day and week.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Classroom teachers and gifted resource teachers work collaboratively to provide appropriate academic services that challenge and engage all learners. Students participate in activities that promote mental development and stimulate academic and creative achievement. Curriculum considerations include an emphasis on the processes of analysis, synthesis and evaluation, the use of divergent thinking skills; a balance between figural and verbal tasks; the complexity and abstractness of a topic; a balance among oral, written, and kinesthetic modes of expression; and a variety of whole group, small group, and individual activities. Students are encouraged to think critically; consider complex problems using high thought processes; create new and original ideas; produce divergent responses; and develop the confidence necessary for risk taking.

F. Procedures for Assessing Academic Growth in Gifted Students

This section includes a description of the procedures used by the division to assess the academic growth for gifted learners.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Assessment practices are an integral part of the learning process and include both formative and summative evaluation procedures for English and mathematics. Formative assessments help teachers shape future lessons and provide appropriate challenges. In addition, they help learners reflect on their work and make improvements. Throughout the year, students have opportunities to assess their own performance, set academic goals, and evaluate their progress in reaching these goals. Summative assessment is used to record student growth. State standards, project criteria, and product goals are the basis for evaluation by teachers, students, and others. The purpose of evaluation is to allow students to fully display their skills and understandings and set new goals for further learning and growth. Student academic growth is documented and communicated to parents annually in multiple ways. This can include parent conferences, report card grades/comments, annual MAP Growth Reports, SOL Growth Reports, etc.

Part VII: Program of Differentiated Curriculum and Instruction (8VAC20-40-60A.11)

The *Regulations Governing Educational Services for Gifted Students* defines appropriately differentiated curriculum and instruction as curriculum and instruction adapted or modified to accommodate the accelerated learning aptitudes of identified students in their areas of strength. Such curriculum and instructional strategies provide accelerated and enrichment opportunities that recognize gifted students' needs for (i) advanced content and pacing of instruction; (ii) original research or production; (iii) problem finding and solving; (iv) higher level thinking that leads to the generation of products; and (v) a focus on issues, themes, and ideas within and across areas of study. Such curriculum and instruction are offered continuously and sequentially to support the achievement of student outcomes, and provide support necessary for these students to work at increasing levels of complexity that differ significantly from those of their age-level peers. This section provides a description of the school division's appropriately differentiated curriculum and instruction demonstrating accelerated and advanced content for gifted learners.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

The division works to ensure that the curriculum is rigorous, relevant, and recognizes the academic needs of high-ability learners in English and mathematics. There is no one size fits all approach to teaching advanced learners and it is important to design curricula that taps the potential of many students and promotes a growth mindset. The curriculum and instruction must be flexible enough to address the needs of a diverse population of learners.

Division curriculum guides serve as a framework from which teachers develop instruction that provides access to high-level thinking strategies. The division also works to ensure learners have access to experiences that are in-depth, complex, and culturally responsive. The curriculum is based on the requirements set forth by local, state, and national guidelines as well as best practices in each field of study.

Differentiation

Strategies of differentiation allow students to be challenged by a variety of instructional practices suited to individual readiness levels, interests, and learning styles. These strategies are incorporated throughout units of study and form the foundation of teacher training efforts. The development and delivery of differentiated curriculum for advanced learners relies on the adjustment of content, process, and product based on students' readiness and interests.

To differentiate **content** in English and mathematics teachers may:

- Organize content around major concepts and key understandings
- Allow for pacing of material through acceleration
- Allow for in-depth study through content enrichment
- Design lessons that require problem finding and problem solving
- Integrate experiences across the disciplines

Charlottesville City Schools

- Allow for student choice

With differentiated **content** learners may:

- Focus on content that is complex, abstract, and multifaceted
- Use multiple and varied advanced materials
- Offer independent study, as appropriate

To differentiate **products** in English and mathematics teachers may:

- Allow for a range of product alternatives; combine teacher and student choice
- Teach skills of planning and production
- Design evaluation methods that are appropriate to the assignment
- Make assessment criteria explicit by using rubrics and/or checklists
- Provide opportunities for students to self-evaluate based on specific criteria
- Offer project-based performance tasks
- Allow for student choice

With differentiated **products** learners may:

- Grapple with real and relevant issues
- Modify existing ideas or create new ones
- Use multiple modes of expression/presentation

To differentiate **process** in English and mathematics teachers may:

- Adjust the pace of instruction
- Emphasize complex-level thinking strategies
- Expect students to go beyond the information given to see what is implied
- Scaffold instruction based on the needs of the learner
- Use tiered activities
- Adjust instruction based on ongoing assessment of students
- Allow for flexible grouping and student choice

With differentiated **process** learners may:

- Use logic and reasoning processes to think through complicated issues
- Ask complex thinking questions about the topic
- Reflect on their thinking and justify their responses
- Work in different group configurations
- Complete independent work

To meet student needs in English and mathematics, classroom teachers and gifted resource teachers employ a variety of strategies, including the use of special resources shown to build problem-solving skills and support the development of critical and creative thinking. Possible components include:

Charlottesville City Schools

Part VIII: Policies and Procedures for Access to Programs and Advanced Courses (8VAC20-40-60A.12)

This section provides the school division's policies and procedures that allow access to programs of study and advanced courses at a pace and sequence commensurate with the learning needs of the gifted student.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

Students are encouraged to plan a course of study that prepares them to meet their academic and career goals. Policies and procedures aim to support open student access to opportunities including advanced coursework. Below are several policies related to programs and acceleration.

[CCS Policy IGBI: Advanced Placement Classes and Special Programs](#) (Reviewed June 27, 2023)

[CCS Policy IKEB: Acceleration Programs](#) (Reviewed June 27, 2023)

Charlottesville City Schools

Part IX: Personal and Professional Development (8VAC20-40-60A.13)

School divisions must provide evidence of professional development based on the following teacher competencies outlined in 8VAC20-542-310 below.

1. Understanding of principles of the integration of gifted education and general education, including:
 - a. Strategies to encourage the interaction of gifted students with students of similar and differing abilities; and
 - b. Development of activities to encourage parental and community involvement in the education of the gifted, including the establishment and maintenance of an effective advisory committee.
2. Understanding of the characteristics of gifted students, including:
 - a. Varied expressions of advanced aptitudes, skills, creativity, and conceptual understandings;
 - b. Methodologies that respond to the affective (social-emotional) needs of gifted students; and
 - c. Gifted behaviors in special populations (i.e., those who are culturally diverse, economically disadvantaged, or physically disabled).
3. Understanding of specific techniques to identify gifted students using diagnostic and prescriptive approaches to assessment, including:
 - a. The selection, use, and evaluation of multiple assessment instruments and identification strategies;
 - b. The use of both subjective and objective measures to provide relevant information regarding the aptitude/ability or achievement of potentially gifted students;
 - c. The use of authentic assessment tools such as portfolios to determine performance, motivation/interest and other characteristics of potentially gifted students;
 - d. The development, use, and reliability of rating scales, checklists, and questionnaires by parents, teachers and others;
 - e. The evaluation of data collected from student records such as grades, honors, and awards;
 - f. The use of case study reports providing information concerning exceptional conditions; and
 - g. The structure, training, and procedures used by the identification and placement committee.
4. Understanding and application of a variety of educational models, teaching methods, and strategies for selecting materials and resources that ensure:
 - a. Academic rigor through the development of high-level proficiency in all core academic areas utilizing the Virginia Standards of Learning as a baseline;
 - b. The acquisition of knowledge and development of products that demonstrate creative and critical thinking as applied to learning both in and out of the classroom; and
 - c. The development of learning environments that guide students to become self-directed, independent learners.

Charlottesville City Schools

5. Understanding and application of theories and principles of differentiating curriculum designed to match the distinct characteristics of gifted learners to the programs and curriculum offered to gifted students, including:
 - a. The integration of multiple disciplines into an area of study;
 - b. Emphasis on in-depth learning, independent and self-directed study skills and metacognitive skills;
 - c. The development of analytical, organizational, critical, and creative thinking skills;
 - d. The development of sophisticated products using varied modes of expression;
 - e. The evaluation of student learning through appropriate and specific criteria; and
 - f. The development of advanced technological skills to enhance student performance.
6. Understanding of contemporary issues and research in gifted education, including:
 - a. The systematic gathering, analyzing, and reporting of formative and summative data; and
 - b. Current local, state, and national issues and concerns.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

The Charlottesville City Schools mission for professional learning is to enhance and support the knowledge, skills, attitudes, and beliefs of staff to create high levels of learning for all students. The division believes that highly effective professional learning is student focused, purposeful, collaborative, and job embedded. To effectively improve the academic achievement of students identified as gifted and meet the goals of the division's Strategic Plan, structures for professional learning strive to increase the capacity of all staff. Professionals must continuously update their skill and knowledge base to meet the ever changing needs of the diverse student body. Professional learning opportunities must reflect learning styles and time constraints of all stakeholders and must be embedded through varied structures such as meetings, classes, curriculum institutes, virtual courses, and conferences. In addition, the division uses research based professional development structures that include professional learning communities, coaching/mentoring, and teacher leadership.

With the ultimate goal being to increase student achievement, the division approaches professional learning in three ways. First, it provides professional learning based on district defined knowledge and skills that lead to the effective performance of all employees. Next, professional learning at the school level includes on-going data driven training that meets the needs of staff members at the site. Finally, personal professional learning focuses on data driven training based on the needs and desires of the individual.

Professional Learning for Gifted Resource Teachers

- Local training on educational experiences offered through a talent development framework
- Local training on strategies for differentiating curriculum and instruction for gifted learners
- Local training on instructional materials appropriate for talent development

Charlottesville City Schools

- Local training on gifted identification procedures
- Monthly staff meetings for collaborating planning and program articulation and implementation
- Reading on topics related to current best practices in gifted education
- Participation in professional learning sponsored by universities and professional organization such as the National Association for Gifted Children and the Virginia Association for the Gifted

The Gifted Resource Teacher should demonstrate an ability to create and carry out flexible, differentiated, and enriched curriculum experiences for students. An endorsement in gifted education is preferred.

Professional Learning for CCS Staff Members

The gifted program coordinator, the literacy coordinator, the math coordinator, gifted resource teachers, and content teachers facilitate professional learning opportunities for staff members across the division. Through faculty sessions, individual and grade level conversations, and professional learning community meetings staff at each building receives information on topics that may include:

- Local training on a talent development framework for gifted education and services
- Local training on gifted identification procedures
- Local training on strategies to meet their academic and social-emotional needs of gifted learners
- Training on differentiating instruction for gifted learners in English and mathematics
- Professional learning sponsored by professional organizations/companies that includes conferences, trainings, webinars, and workshops

Charlottesville City Schools

Part X: Procedures for Annual Review of Effectiveness (8VAC20-40-60A.14)

This section provides the procedures for the annual review of the effectiveness of the school division's gifted education program, including the review of screening, referral, identification, and program procedures toward the achievement of equitable representation of students, the review of student outcomes and the academic growth of gifted students. School divisions may decide to focus on one or more areas to review each year. However, reviews shall be based on multiple criteria and shall include multiple sources of information.

Area of Giftedness: Specific Academic Aptitude (English and mathematics)

The annual review of the effectiveness of gifted education programs for the Charlottesville City Schools is based on criteria that includes:

1. The annual report for the Virginia Department of Education
2. A report on the gifted identification process that includes the number of students found eligible by subgroups, including historically underrepresented subgroups.
3. The number of students who take high school Advanced Placement and Dual Enrollment classes in English and mathematics, including those from underrepresented subgroups.
4. The number of Advanced Placement course offerings and the number of students who score at each level (1-5) on the Advanced Placement exam.
5. The progress made toward reaching the program goals and objectives as outlined in Part II of the division's Local Plan for the Education of the Gifted.

Using Charlottesville's Local Plan for the Education of the Gifted as its basis, the Gifted Advisory Committee will delineate areas of focus for the annual review. These include program goals and objectives as outlined in the Local Plan, elementary and upper elementary services, secondary services, and professional learning. The program coordinator and gifted resource teachers, in conjunction with the committee, identify accomplishments in each area and set goals for the next school year. Each spring, the Gifted Advisory Committee shares this information with the Superintendent and School Board in a written report.

Charlottesville City Schools

Part XI: Procedures for the Establishment of the Local Advisory Committee (8VAC20-40-60B)

Each school division may establish a local advisory committee composed of parents, school personnel, and other community members who are appointed by the school board. This committee shall reflect the ethnic and geographical composition of the school division. This section should include the school division's procedures for the establishment of the local advisory committee for the gifted program if the division has elected to establish a committee.

The Gifted Advisory Committee is composed of two parent/community representatives from each school in the division as well as a School Board representative. Gifted resources teachers, support staff, and the program administrator attend committee meetings as ex-officio members.

Each spring, and if necessary again in the fall, nominations are solicited at all division schools when there are openings. The Coordinator of Gifted Education reviews these recommendations to guarantee membership represents all components of the division's gifted education program and reflects the ethnic and geographic composition of the community.

The School Board approves appointments to the committee for a one-year term that can be renewed.

Charlottesville City Schools

Part XII: Assurances (8VAC20-40-60A.6; A.7; A.8; A.9)

In accordance with the *Regulations Governing Educational Services for Gifted Students*, the following assurance must be provided by the school division:

- Assurances that student records are maintained in compliance with applicable state and federal privacy laws and regulations;
- Assurances that (i) the selected and administered testing and assessment materials have been evaluated by the developers for cultural, racial, and linguistic biases; (ii) identification procedures are constructed so that those procedures may identify high potential or aptitude in any student whose accurate identification may be affected by economic disadvantages, by limited English proficiency, or by disability; (iii) standardized tests and other measures have been validated for the purpose of identifying gifted students; and (iv) instruments are administered and interpreted by trained personnel in conformity with the developer’s instructions;
- Assurances that accommodations or modifications determined by the school division’s special education Individual Education Plan (IEP) team, as required for the student to receive a free appropriate public education, shall be incorporated into the student’s gifted education services; and
- Assurances that a written copy of the school division’s approved local plan for the education of the gifted is available to parents or legal guardians of each referred student, and to others upon request.

Pursuant to these requirements, I hereby certify that the school division is in compliance with this language.
