

# BRHD Covid Update

.....  
Dr. Denise Bonds, District Health Director

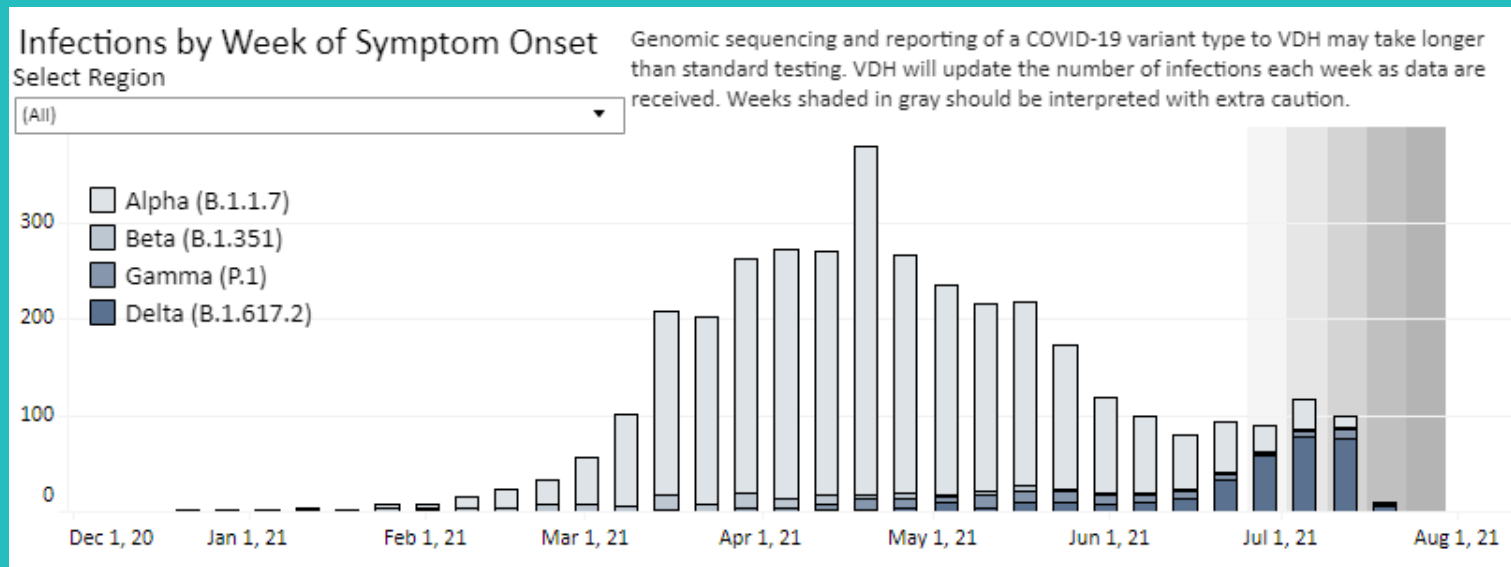

August 5, 2021

# Where we are today . . .

# What has changed?

## Delta Variant

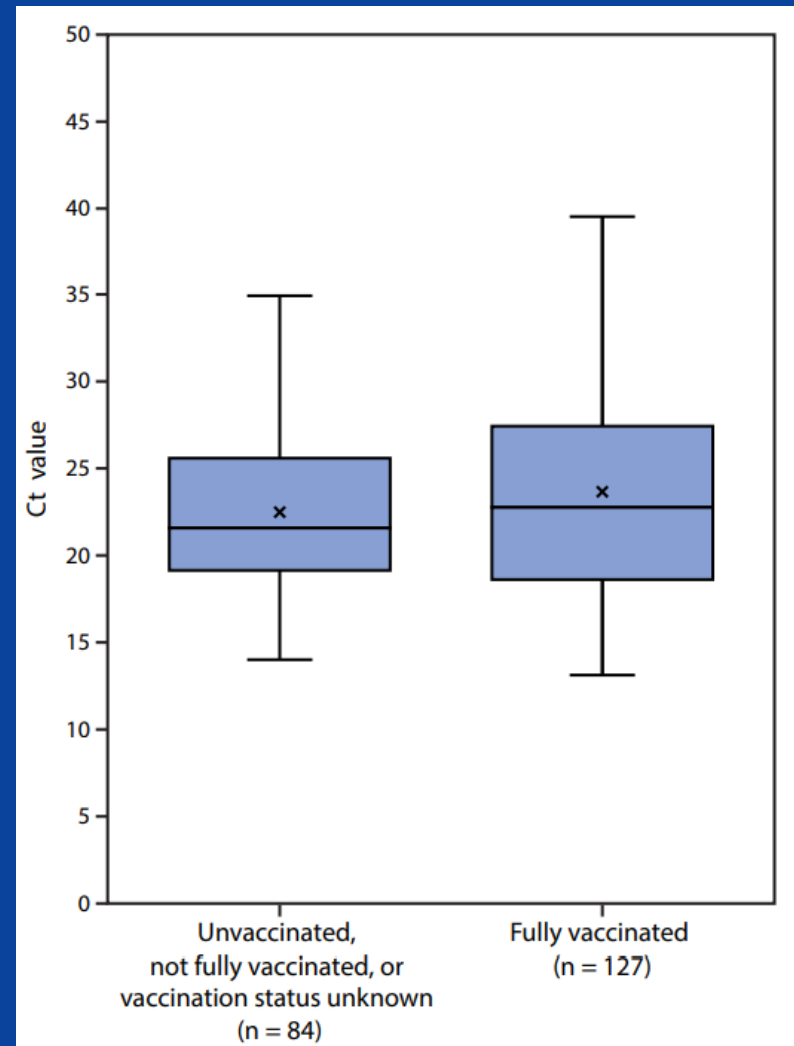

# Viral load high with Delta

<https://www.cnn.com/2021/08/01/us/provincetown-outbreak-residents-response/index.html>

469 cases | 346 (74%) vaccinated | 274 (79%) symptomatic | 4 (1.2%) hospitalized | 0 deaths

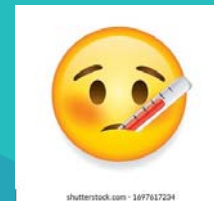

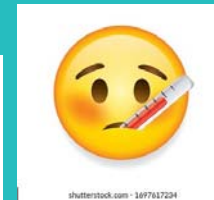

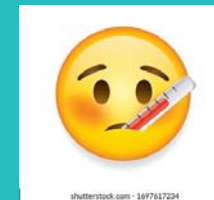

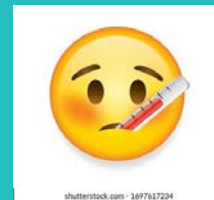

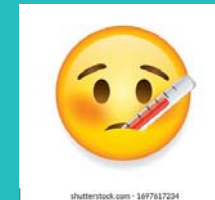

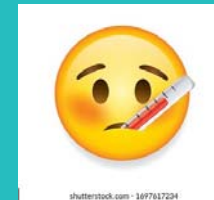

<https://www.cdc.gov/mmwr/volumes/70/wr/pdfs/mm7031e2-H.pdf>

# Delta variant highly infectious

Original COVID Virus

# Delta Variant COVID Virus

# Solution?

## Get Vaccinated!

Current COVID vaccine highly effective at preventing hospitalization and death, even against Delta Variant

More people vaccinated = Lower risk for community transmission

Few transmissions in the community = Less risk for development of other variants

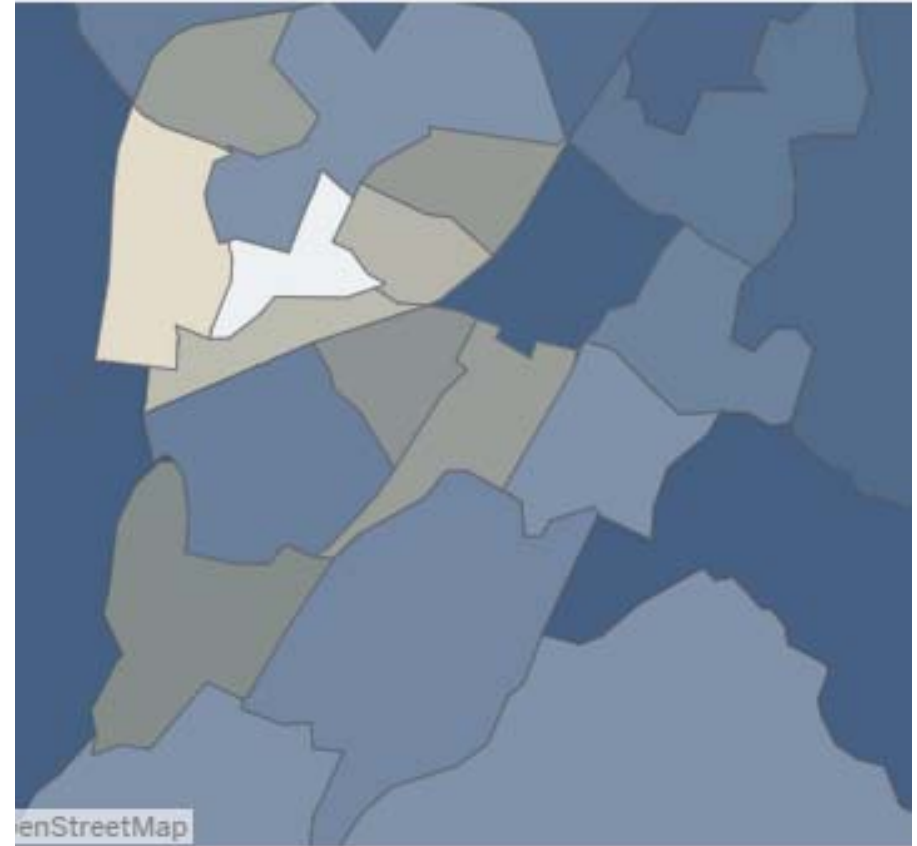

Updated August 4, 2021

# How are we doing?

People with at least One Dose	Percentage with at least One Dose	People Fully Vaccinated	Percentage Fully Vaccinated
28,346	60% (adults: 67.5%)	25,684	54.3% (adults: 61.5%)

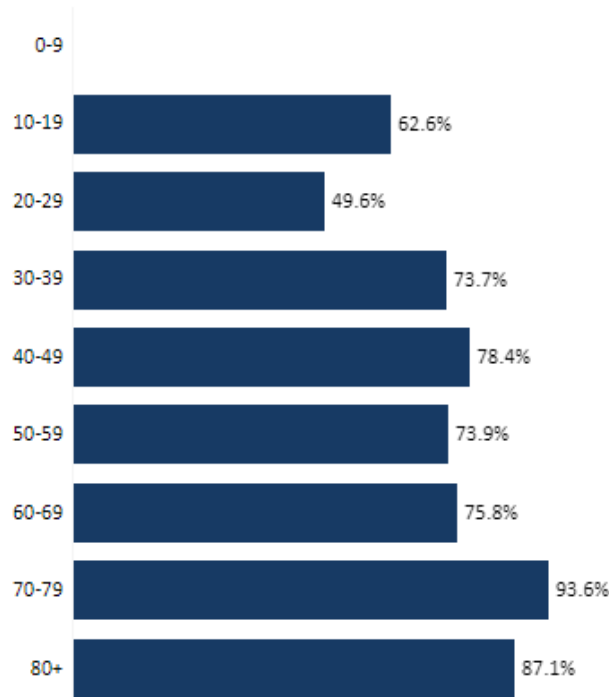

Vaccination information from the VDH public website.

Updated August 2, 2021

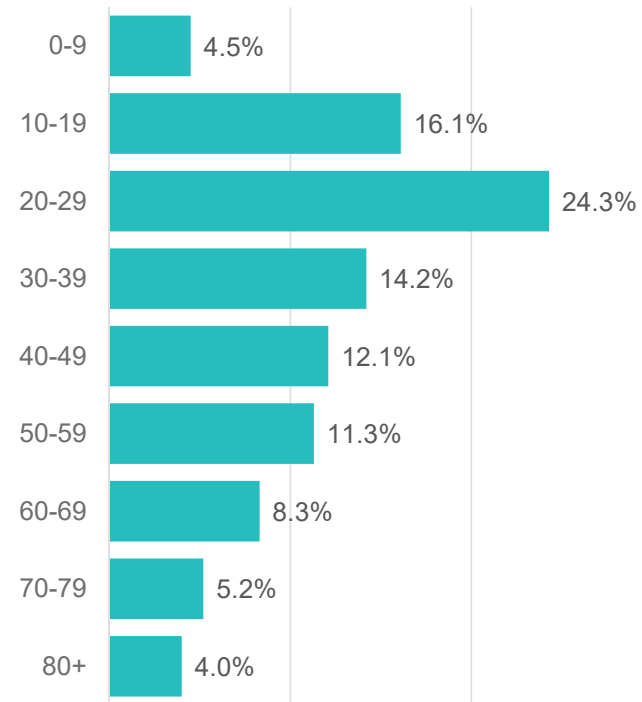

# % vaccinated by age group

(Charlottesville data)

# % cases by age category

(BRHD data)

# What (else) can you do?

- **Get Vaccinated!**
  - Vaccines are the best way to end the pandemic
  - Safe and effective
  - More individuals vaccinated = less chance for additional variants to develop
- **Wear a mask when out and about**
  - Who?
    - Students, faculty and staff in school
    - Those who are unvaccinated or ineligible for vaccine (children under 12)
    - Vulnerable, vaccinated adults/children (older adults, those with compromised immune systems, those with many chronic medical conditions)
    - Adults who live with or frequently see either unvaccinated individuals or vaccinated individuals who would be considered medically vulnerable
    - Anyone who feels more comfortable regardless of vaccination status

## Expanded Sites and Access
